THE BOY SCOUTS; THEIR ORIGIN AND AIM

Answers to Questions Which Are Frequently Asked.

Origin.—Started in England by Gen. Baden Powell. In America by Mr. Seton.

Aim.—To supplement the various educational institutions in building character for boys and promoting their ability to do things for themselves and others.

Classes.—Tenderfoot, second class and first class. Qualifications for tenderfoot and second class outlined on accompanying sheets—first class, a continuation and advancement of all activities indicated for second class.

Organization.—The unit is a patrol of eight scouts. Any number of patrols form a troop. A scoutmaster is in charge of a troop. Patrol leader at head of a patrol. Scout commissioner at head of scoutmasters. Scout commissioner recommended by local council and appointed by Chief Scout Seton. Executive committee composed of officers of local council, scout commissioner and scoutmasters, and this is the governing body.

Age Limit for Scout Enlistment.—Twelve to eighteen years of age.

Undenominational and unattached to any other organization or association. The Y. M. C. A. of Phoenix, however, is responsible for projecting the work in this section of the country, and at present the territory of the movement is restricted to Maricopa county.

Local Council.—Composed of representative men of the county. Purpose is to give the movement the strongest possible endorsement and to furnish talent to be used in instructing the scouts in various departments and phases of scoutcraft.

The following is the list which the Boys' Work committee has made, and all but a very few of the gentlemen herein named have given their consent to serve, and we wish to urge the others to give us a prompt reply, consenting if possible to serve:

Gov. R. E. Sloan, Mayor Lloyd B. Christy, Postmaster Jas. H. McClintock, Consul Ricardo D. Bravo, City Attorney T. J. Prescott, Sheriff Hayden, Judge J. C. Phillips, Judge E. B. Thomas, Chief of Police A. J. Moore, Chief Sullivan of the fire department, Col. L. W. Coggins, Major E. P. Grinstead, Hon. H. B. Wilkinson, Hon. B. E. Marks, Earl Hill, D. B. Heard, H. J. McClung, J. W. Dorris, W. G. Tolleson, Frank DeSousa, Prof. A. K. Stabler, Prof. J. D. Loper, Prof. D. F. Jantzen, C. H. Akers, J. O. Dunbar, Sims Ely, J. F. Cleveland, L. C. Hill, Dr. J. C. Hammett and Ray Lehman. The council will be enlarged.

Aim.—To give boys something to do, something to think about, something to enjoy out of doors, with a view always to character building, for manhood is our first aim.

Scout Oath.—I give my word of honor that I will do my best to do my duty to my God and to my country, to help other people at all times, and to obey the Scout law.

The Salute.—Right hand, thumb resting on nail of little finger and first three fingers pointing upwards.

The hand held thus and raised to a level with the shoulder is the half salute. Raised to the level of the forehead, it is the full salute. The half salute is used except when saluting an officer, the flag, an officer of the army or navy, when the national emblem is played, or at a funeral, when the full salute is used.

The Scout Law.

Motto—"Be Prepared."

1. A scout's honor is to be trusted.

2. A scout is loyal to the president, officers, parents, country and employers.

3. A scout's duty is to be useful and to help others. It is his pride to try his best to do a good turn to somebody every day without a reward.

4. A scout is a friend to all and a brother to every other scout, no matter to what social class the other belongs.

5. A scout is courteous to all.

6. A scout is a friend to animals.

7. A scout obeys the orders of his parents, patrol leader or scoutmaster without question.

8. A scout smiles and looks pleasant under all becoming circumstances.

9. A scout is thrifty; he saves every penny he can and puts it into the bank, so that he may have money to keep himself when out of work or that he may have it to use for others when they need it.

Tenderfoot Test.

A boy upon joining must be 12 years of age and under 18.

1. Know the scout law, signs and salute.

2. Know the history of the stars and stripes.

3. Tie properly and name the four following standard knots: Reef, bowline, fisherman's and halter.

Then he may take the scout's oath and enroll as a tenderfoot, and is entitled to wear the buttonhole badge.

Second Class Scout Test.

2. Elementary first aid and bandaging.

3. Signalling, elementary knowledge of semaphore, Myer or Morse alphabet.

5. Go a mile in twelve minutes at "scout's pace."

6. Lay and light a fire, not using more than two matches.

7. Cook a quarter of a pound of meat and two potatoes without cooking utensils other than the regulation kit.

OVERDOING THE CONSERVATION STUNT.

The 65,000 Americans who reside in Alaska may believe ever so firmly in the principles of conservation and yet be at fault for insisting on accessibility of resources essential to their present needs. They are not to be blamed for urging development of Alaska coal which lies at their door, while they are paying \$18 a ton, with duty added, for an inferior grade of British Columbia coal.

Not only do Alaska-Americans clamor for development of these coal deposits, but they are beginning to send up rather voluminous appeals for a form of autonomy in government which will give them as much freedom as territories within the Union have enjoyed. They are objecting to the commission form of government sent out from Washington, as they have a right to object, though it should be noted that they are supported in this by the president, who has gone so far as to urge upon the present congress the need of a more responsive system of governing this great northwest domain. It seems fair to assume that the Alaskans will not have to wait long for this concession, since the federal government is quite as deeply impressed with its need as any resident of the territory can possibly be.

The Alaskan problem is a large one, though, and one that cannot be solved in a day. It should be remembered that whatever move is made toward a form of government more responsive to present needs in Alaska and its development will benefit the entire United States, and not alone Alaska. The opening up of these vast coal tracts, themselves comprising an area of 1200 square miles, must in time bring great advantages to the people living in the states, also. For us to assume that the federal government is not interested in Alaska's early development would be a bad mistake unless we fall into the extreme view that all the resources of the territory except coal are already gobbled up and that, therefore, the government does not care to make a move.—Omaha Bee.

WHERE EVERYTHING GOES.

The crowded condition of the other cars had compelled the elderly, austere person to go into the smoker, and he was listening to horrified astonishment to the ribald, profane conversation around him.

"Is there nothing held sacred in a smoking car?" he asked, turning to the man next to him.

"Not a thing," said the man, striking a match on the window casing; "not even the woodwork."—Chicago Tribune.

This Alternative is not a new medicine. It has been conquering Tuberculosis for several years, curing resulting after other methods had failed.

Think what this means. No specialist's fees; no sanatorium charges; no traveling expenses. Eckman's Alternative has cured many people at home, where their dear ones encourage them and give them that tender care which money cannot buy.

After you have thoroughly investigated our affidavits and testimonials—feeling sure in your own mind that if Eckman's Alternative has cured so many others, it surely must help you—start taking the Alternative. Your improvement should be gradual, but certain.

If you have been faithful to Eckman's Alternative, you will be amazed at your improvement. A statement from one who knows follows:

220 So. 4th St., Colwyn, (Darby) Pa. Gentlemen: For four years I was troubled with cough, which gradually became worse; I had night sweats and pains in my chest. I was losing my appetite and had become so thin and weak I could not attend to my household duties. A physician pronounced my case Consumption. Not being satisfied, I was examined by the physicians of the Polyclinic Hospital; they also pronounced the disease Consumption, which was proven later, by an examination of sputum, as Tuberculosis Bacilli was found. I was ordered to a Consumptive Hospital. My nephew would not allow me to go until I had tried Eckman's Alternative. Before I had taken the medicine three weeks I had marked relief; night sweats ceased; pain in the breast relieved; cough became loose and easy; fever left me and I commenced getting well. My health became normal. I am in excellent health now and have been completely cured for ten years. I strongly recommend it.
